

HEADING SOUTH FOR THE WINTER?

Massena Electric has some simple tips that will save Energy and YOU MONEY while you're away!

✓ ***Unplug unnecessary electronics***

- Digital clocks, Small appliances, Microwaves
- Power strips with your TV & Cable Box, Computer & Monitor

You would be amazed how much these use just by leaving them plugged in!

✓ ***Unplug the Spare Refrigerator***

Do you really need this running while you're away?

✓ ***If you like to leave lights on consider using a timer, and make sure you use Energy Saving CFL bulbs***

✓ ***Put Caulk or weather-strip around drafty windows and doors.***

No sense letting cold air in while you're away

✓ ***Lower your thermostat one or two degrees***

Lowering your thermostat could save you 3-5% on your heating bill.

*“Make the Right Energy Choice.
If we each do a little, we all save a lot!”*
